Academic Profile

My major fields of interest and research are macro-economics, economic growth, finance and labor economics. My published research **includes 62 refereed papers**, I wrote **thousands of pages in refereed academic books**.

My published research in labor economics includes several theoretical papers on labor market flows and the effect of benefits, gender and qualifications on unemployment and on worker mobility.

My research in macroeconomics includes a theoretical model and an empirical examination of the desired government policy needed for the minimization of the social loss function.

My research in Economic Growth includes the extension of the overlapping generation model to include multiple categories of labor. My published includes the analysis of pollution, health and other aspects along the growth path of the economy. My research in finance and corporate finance includes the examination of first-day and yearly yield following initial public offering in Israel

Other papers published by me discusses the validity of the Put Call Parity, the causality relationships among worlds' stock markets, the validity of CAPM model, and Examination of the effect of natural phenomena's on stocks' yield in Israel. Most of my published papers were written by me as a sole writer. I Wrote with other

coauthors professional books in Econometrics and in Labor Economics, published by The Open University in Israel.

I wrote the Novel: "**The Silence of the Chariot Descenders**" – Published by Steimatsky. The Novel was translated to English, see in Amazon the English Version at:
