7. Academic Profile

The commencement of my academic research career corresponded to the rise in popularity of the religious fundamentalism, especially, the Islamic Movement and Shas in Israel. Two books and several articles were published in this arena. The issue of Arab-Jewish relation and the policy of the state towards Arab minority involved my research. I have published a number of articles on this subject in both journals and books. Finally, the arena of Arab women in Israel and the Comparison with women in the Arab World and the Jewish women in Israel several field interesting me so much. This issue contributed most to my research publication.
